**SUBLIMATED**

Sublimated apparel that dye your logos, names, numbers, and designs into the fabric. This allows the apparel to be showcase vibrant colors and bold designs that you can't achieve with traditional apparel.

**CUT & SEW**

"Cut and Sew" garments are made using pre-existing fabrics, which are cut to pattern and sewn together. This technique is limited to design and colour options. Welcome to require dyed [stock fabric colour chart](#).

**YARN DYED KNITTED**

Traditional uniform for school leavers and rugby player. Easy custom made your unique jersey. With knitted fabric, each product cut out, and sewn together by an incredibly talented team assuring the highest quality is achieved with each piece.

**ACTIVEWEAR**

ery popular sportswear recently, Using high quality spandex fabrics and special sewing method, They will make wear comfortable. Some research shows that compression wear increases circulation and blood flow, resulting in faster recovery. Reduces injury risk by stabilising muscles and reducing impact.

## EMBROIDERY

Embroidery is a traditional customization option where the artwork is sewn into the garment. It is typically used on garments that aren't compatible with tackle twill or screen print.

## SCREEN PRINT

Screen Print apparel are garments that are created by applying the colored ink to the garment. It can be the most affordable method of customization. It offers simple color graphics and also has optional screen pressed numbers.

## HEAT TRANSFER

A Heat Press transfer is an embellishment where artwork is printed onto an adhesive material then melted on desired fabric. An alternate, cheaper option than embroidery, heat press is usually used for names, logos and playing numbers.

## PROFESSIONAL

Professional sports wear used in competition need special fabric and techniques. We can produce pro rugby [foam protective kit](#), pro [compression wear](#), pro [neoprene](#) surfing wetsuit, pro lacrosse kit...

These technologies can make your sportswear more attractive, colors unlimited and easy to custom individual name and numbers.

Makes your team like a champion.

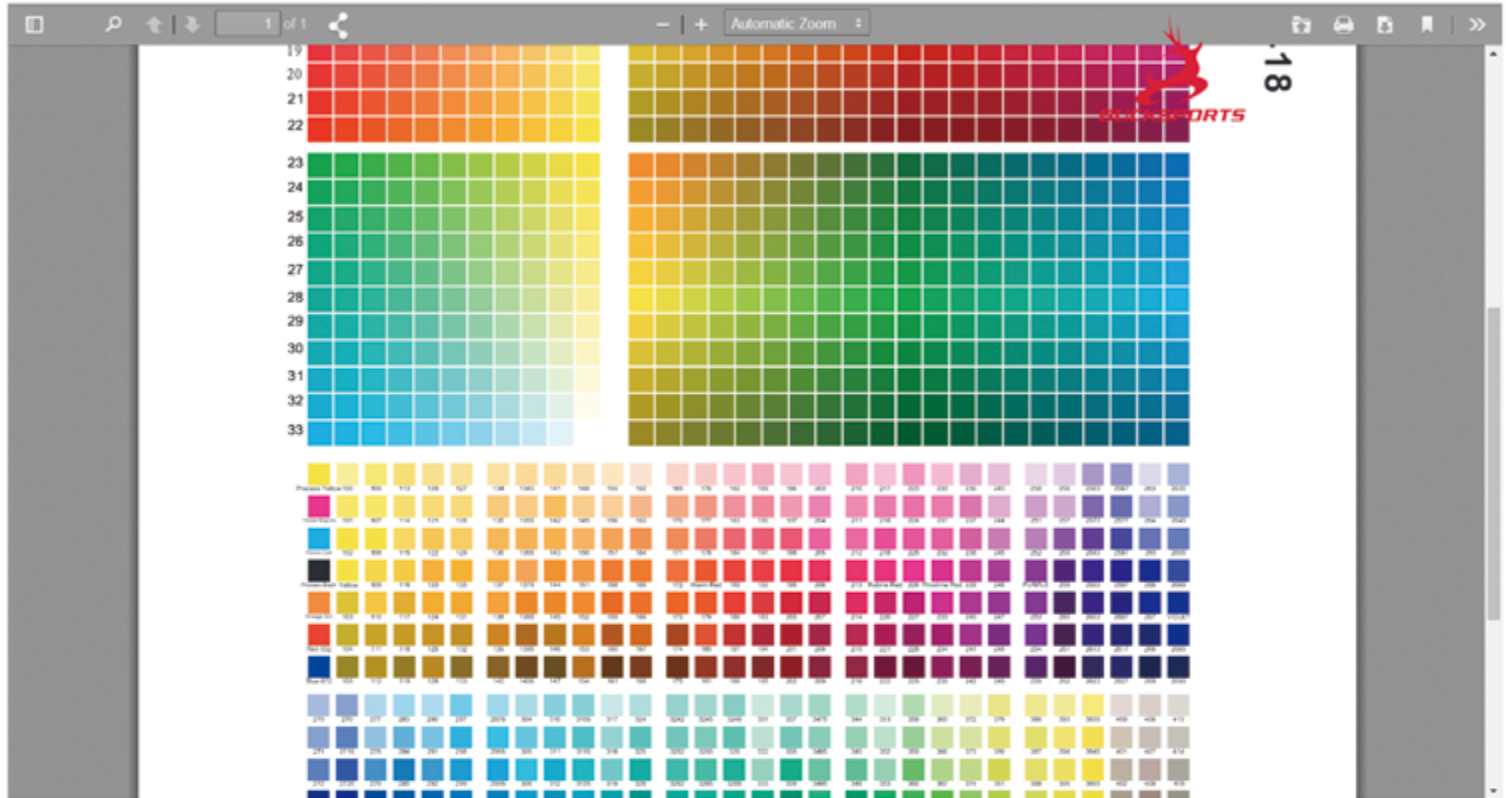

# SUBLIMATION COLOUR CHART

Over 400 of the most commonly ordered colours

Our standard sublimation colour chart (shown below on fabric B03) features over 400 of the most commonly ordered colours. If the colour you require is not in our standard palette range, please don't be alarmed. Please provide PMS(Pantone® matching system) colour number, so we can match it.

If you're very particular about your team or brand colours, we can create an incremental palette for you. An incremental palette is a series of colour swatches based on an initial source colour with a range of subtle variations. You have complete control with sublimated sportswear when it comes to choosing colours.

[Fullscreen Mode](#)

\*This colour chart is to be used as a guide only. Please contact us for a physical colour chart to ensure accurate colour selections. The colours you see on your computer monitor may be different to the colours on the apparel. This is due to your screen being calibrated in RGB format and your printing process being CMYK format. In addition, the variation in screen models and manufacturers can have an impact on the way a colour displays.

## SUBLIMATED FIUO INK COLOUR

## UPF – WHAT DOES IT MEAN?

Overexposure to ultraviolet radiation over many years causes serious health problems such as skin cancers. Clothing that is sensibly designed for sun protection reduces your exposure. Materials with Ultraviolet Protection Factor (UPF) ratings of 40 and higher provide all-day protection for the fairest skin. A garment only protects the skin it covers. Protect your head and exposed skin by wearing a hat, sunglasses and sun screen and use shaded outdoor areas. For more information about UPF and UV radiation visit [www.arpana.gov.au/uv](http://www.arpana.gov.au/uv)

## AS/NZS 4399 AUSTRALIAN STANDARD FOR SUN PROTECTIVE CLOTHING

This UPF rating is for the fabric and does not address the amount of protection which is afforded by the design of the article. The manipulations involved in garment manufacture such as stretching and sewing may lower the UPF of the material. Articles which have been designed to cover the maximum area of the body are recommended. The protection offered by this item may be

lessened...

at points where the fabric is in close contact with the skin such as across the shoulders;

if the fabric is stretched;

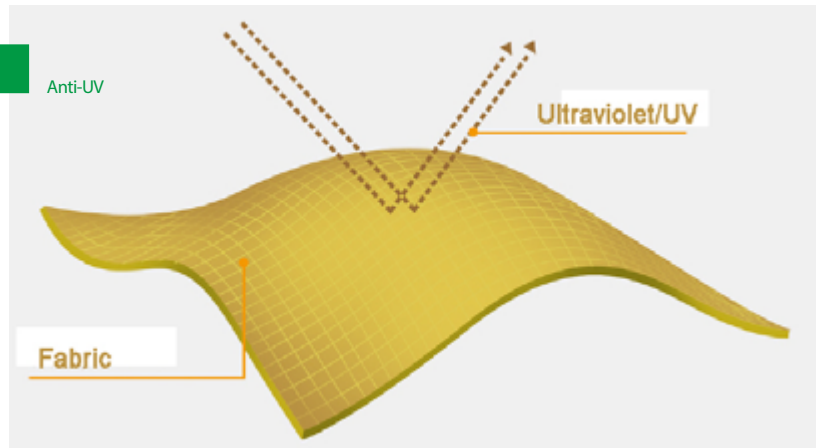

if the fabric is wet;

with thin, due to the effects of normal wear.

Headwear & shade products:

This item does not provide protection against reflected or scattered solar ultraviolet radiation (UVR)

## PATTERN-SAMPLE-SIZE

Custom appare control process system PSS

All jobs begin with pattern which we named pattern-sample-size PSS system. Based on EUR mannequins and local market data, our professional pattern designer who have 15 years of experiences will make all patterns for sports garments. He will try and adjust different sizes garments to complete the final size charts. But this was only a beginning, all patterns will be revised again based on customers feedback, such as length of sleeves, collar sizes and so on. We started our garments business on 2010, most of patterns have been revised for 3-5 times. Of course, all things we were doing just for customers can get satisfied garments.
